

# Trends in Distance Education in South America

**Luis Barrera**

*Cesar Vallejo University, Peru*

## INTRODUCTION

This article reviews the history, state of the art, and future trends in distance education, in South American countries, through an overview of the main experiences in the region.

South America is in the western hemisphere, connected to Central and North America by the Isthmus of Panama. Twelve countries form this continent: Argentina, Bolivia, Brazil, Chile, Colombia, Ecuador, Guyana, Paraguay, Peru, Suriname, Uruguay and Venezuela. As reported by the United Nations Development Programme (2007), all of them are developing countries, characterized by a difficult social reality as a result of political and economic crisis in the course of its history.

South American countries' basic indicators (see Table 1) show an average gross domestic product per capita 3 to 30 times lower than those from developed countries. Despite the sustained growth of access to information and communication technologies, with an average DOI (digital opportunity index) of 0.39 (ITU, 2006), a bandwidth growth rate of 479% between 2001 and 2002 (Parkes, 2004), and an Internet use growth rate of 374% between 2000 and 2007 (MMG, 2007), only 13.99% of the South American population has access to Internet.

Multiethnic, multicultural, and geographically disperse nations cause a gap, a social inequality between urban and rural population; therefore, governments, as well as international institutions and nongovernmen-

*Table 1. South American countries' basic indicators (2006)*

| Country              | Population    | GDP (gross domestic product) per capita in 2004 | Telephone Lines       | Cellular Mobile Subscribers | Internet Users | Personal Computers in 2004 | DOI         |
|----------------------|---------------|---|-----------------------|-----------------------------|----------------|----------------------------|-------------|
|                      | (millions)    | (U.S. \$)                                       | (per 100 inhabitants) |                             |                |                            |             |
| Argentina            | 38.59         | 4,007   | 24.47                 | 57.41                       | 17.78          | 9.07                       | 0.47        |
| Bolivia              | 9.18          | 967   | 7.04                  | 26.37                       | 5.23           | 2.33                       | 0.30        |
| Brazil               | 186.40        | 3,278   | 21.38                 | 46.25                       | 17.24          | 16.09                      | 0.42        |
| Chile                | 15.59         | 6,166   | 22.04                 | 67.79                       | 28.93          | 14.75                      | 0.52        |
| Colombia             | 45.60         | 2,152   | 16.84                 | 47.92                       | 10.39          | 4.15                       | 0.38        |
| Ecuador              | 13.23         | 2,295   | 12.7                  | 47.22                       | 7.32           | 6.55                       | 0.36        |
| Guyana               | 0.75          | 1,051   | 14.66                 | 37.45                       | 21.3           | 3.86                       | 0.29        |
| Paraguay             | 6.16          | 1,018   | 5.2                   | 30.64                       | 3.25           | 7.47                       | 0.30        |
| Peru                 | 27.97         | 2,513   | 8.05                  | 19.96                       | 16.45          | 10.01                      | 0.39        |
| Suriname             | 0.45          | 2,484   | 18.04                 | 51.82                       | 7.12           | 4.55                       | 0.33        |
| Uruguay              | 3.25          | 4,078   | 30.95                 | 35.54                       | 20.55          | 13.27                      | 0.43        |
| Venezuela            | 26.75         | 4,164   | 13.48                 | 46.71                       | 12.37          | 8.19                       | 0.43        |
| <b>South America</b> | <b>373.92</b> | <b>2,848</b>                                    | <b>16.24</b>          | <b>42.92</b>                | <b>13.99</b>   | <b>8.36</b>                | <b>0.39</b> |

tal organizations, have been using different kinds of technologies to increase access to education (see Table 2) as a way to improve the standards of living and to reduce poverty.

## BACKGROUND

South American countries have been involved in distance education since the beginning of the last century. Different approaches have been applied in the implementation of distance-education projects: government managed, privately sponsored, branches

Table 2. Some distance education projects in South America

| Country      | Project   | Technology                        | Educational Level   | Year        | Approximate Number of Involved Learners   |
|--------------|---|-----------------------------------|---|-------------|---|
| a. Colombia  | Acción Cultural Popular<br>Radio Sutatenza              | Radio<br>+ Texts                  | Basic education for rural adults and children                             | 1947 - 1989 | 8 million over the years  |
| b. Bolivia   | Radio Mathematics                                       | Radio                             | Mathematics: primary grades 2-5   | 1986        | 250,000 in 1994   |
|              | Radio Health  | Radio                             | Health orientation  | 1992        |   |
|              | Early Childhood development                             | Radio                             | Child development for careers   | 1994        |   |
| c. Brazil    | Fundação Roberto Marinho - Rede Globo<br>Telecurso 2000 | Television<br>+ Texts             | Primary, secondary, and vocational education for out-of-the school people | 1995        | 7 million by TV<br>5.2 million texts sold<br>200,000 formerly enrolled in 1999              |
| d. Venezuela | Maths   | Radio                             | Basic math  | 1991        | 3 million in 1999   |
| e. Chile     | Enlaces   | Computers<br>+Internet            | National primary and secondary school network                             | 1992        | 3.08 million in 2007  |
| f. Brazil    | Proinfo   | Computers<br>+Internet            | National primary and secondary school network                             | 1997        | 258,560 teachers in 2004<br>6 million students<br>7.5 million projected                     |
| g. Colombia  | CRECE<br>Escuela Virtual                                | Computers<br>+Internet            | Computer-based learning in some primary and secondary schools             | 1998        | 10,949 rural students in 2002<br>1,000 urban students in 2002                               |
| h. Peru      | Huascarán   | Computers<br>+Internet            | National primary and secondary school network                             | 2001        | 2.53 million students in 2005<br>48,267 teachers in 2005<br>7.45 million projected for 2010 |
| i. Venezuela | Fundabit  | Computers<br>+Internet            | Basic education   | 2001        | 40,543 teachers<br>357,453 students<br>197,070 other users                                  |
| j. Argentina | Educ.ar   | Computers<br>+Internet            | Primary and secondary schools national network                            | 2002        | 5 million students in 2007  |
| k. Colombia  | CERES   | Computers<br>+Internet            | Higher Education Regional Centers   | 2005        | 10,297 rural students in 2007   |
| l. Bolivia   | Telecentros Educativos Comunitarios<br>TEC              | Computers<br>+Internet            | National primary and secondary school network                             | 2006        | 150,000 projected for 2009  |
| m. Uruguay   | CEIBAL  | One Laptop per Child<br>+Internet | National primary and secondary school network                             | 2007        | 300,000 students and 16,000 teachers projected for 2009                                     |
