- To study the Elements of Mutual Fund Marketing Mix and the 7 Ps concept,
- To study the preferred distribution channels of mutual funds industry
- To study methods adopted by mutual funds for the promotion and advertisement,
- To study the challenges faced by the mutual fund industry related to Marketing strategy.

## **INTRODUCTION**

A mutual fund is a financial intermediary that pools the savings of investors for collective investment in a diversified portfolio of securities. A fund is “mutual” as all of its returns, minus its expenses, are shared by the fund’s investors (Meena, 2011). The Securities and Exchange Board of India (Mutual Funds) Regulations, 1996 defines a mutual fund as a fund established in the form of a trust to raise money through the sale of units to the public or a section of the public under one or more schemes for investing in securities, including money market instruments. According to the above definition, a mutual fund in India can raise resources through sale of units to the public. It can be set up in the form of a Trust under the Indian Trust Act. The definition has been further extended by allowing mutual funds to diversify their activities in the following areas: · Portfolio management services · Management of offshore funds · Providing advice to offshore funds · Management of pension or provident funds · Management of venture capital funds · Management of money market funds · Management of real estate funds A mutual fund serves as a link between the investor and the securities market by mobilizing savings from the investors and investing them in the securities market to generate returns. Thus, a mutual fund is akin to portfolio management services (PMS). Although, both are conceptually same, they are different from each other. Portfolio management services are offered to high net worth individuals; taking into account their risk profile, their investments are managed separately. In the case of mutual funds, savings of small investors are pooled under a scheme and the returns are distributed in the same proportion in which the investments are made by the investors/unit-holders. Mutual fund is a collective savings scheme. Mutual funds play an important role in mobilizing the savings of small investors and channelizing the same for productive ventures in the Indian economy.
