Library of Congress Cataloging-in-Publication Data

Successes and new directions in data mining / Florent Messegli, Pascal Poncelet & Maguelonne Teisseire, editors.

p. cm.

Summary: "This book addresses existing solutions for data mining, with particular emphasis on potential real-world applications. It captures defining research on topics such as fuzzy set theory, clustering algorithms, semi-supervised clustering, modeling and managing data mining patterns, and sequence motif mining"--Provided by publisher.

Includes bibliographical references and index.

ISBN 978-1-59904-645-7 (hardcover) -- ISBN 978-1-59904-647-1 (ebook)

British Cataloguing in Publication Data

A Cataloguing in Publication record for this book is available from the British Library.

All work contributed to this book set is new, previously-unpublished material. The views expressed in this book are those of the authors, but not necessarily of the publisher.

If a library purchased a print copy of this publication, please go to www.igi-global.com/reference/assets/IGR-eAccess-agreement.pdf for information on activating the library's complimentary electronic access to this publication.

30 more pages are available in the full version of this document, which may be purchased using the "Add to Cart" button on the publisher's webpage: www.igi-global.com/chapter/fuzzy-set-theory-useful-data/29952
